

Wireless DIY Lock Kit

User Manual

INTRODUCTION

The D1/D3 is a wireless smart lock kit for home use. Super strong 3M stickers provide a simple way for installation. 433MHz Rolling Code of encryption algorithm and the split design guarantee higher-secure. The Keypad can store 500 PIN/card users. Because of ultra low power consumption, the Keypad and Remote Transmitters can work as long as one year (bases on 30 times /day). Wireless Lock can work 6 months. It will remind people to replace batteries intelligently if low battery.

D1 including: ABS Wireless Keypad (Non-waterproof) + Wireless Lock + two Remote Transmitters

D3 including: Metal Wireless Keypad (Waterproof) + Wireless Lock + two Remote Transmitters

Common Features:

- 500 PIN/card users
- 4-8 digits PIN, 125 KHz EM Card
- With two Remote Transmitters
- Touch the Wireless Lock to open/close
- 433MHz Rolling Code technology
- Communication distance: 50m Max
- Ultra low power consumption

INSTALLATION

Method 1: Stick by 3M stickers

The device packed with 3M double-side stickers, can easily stick the Wireless Keypad and Wireless Lock on smooth surface (We used high-quality 3M stickers, the stickiness will be the best after sticking in 24 hours).

Below introduction for how to install Wireless Lock intensively:

Attentions of installing the Hasp

Confirm the direction and position of Hasp, meanwhile, make sure the Hasp align the doorframe. (So please make sure the direction of Hasp is fit for main body of lock before installation.)

Installing the Hasp

Put the Locating Rings into Hasp, and stick the 3M sticker at the back side of Hasp (You can screw the hasp on the Reinforcing Plate if needed, then stick 3M sticker at the back of plate. It can increase the stick area to make the Hasp stronger).

Installing the main body of lock

Fix the main body of lock and the Fixed Plate by M5*6 hex screws in the packaging, and stick the 3M sticker on the back of Fixed Plate.

Combining the lock

Press the Mechanical Switch on the main body of lock to open the lock mechanically, and match the Hasp. Make sure it can be combined with Hasp perfectly, then stick the mail body of lock on the door.

Note: Mechanical Switch, it is used for installation and equipment trouble, please don't press it often in the normal condition.

When press the Mechanical Switch, the lock will be unlock all the time until open the door one time by valid card, or valid PIN, or touch the close icon on the Lock, or unlock button on Remote Transmitter.

Method 2: Install by screws
