

Access Control Software Operation Guide

Jan. 22, 2024

CREATE SECURITY FOR YOU

Support Method:

- ✧ email: be.seen@hotmail.com
 - ✧ skype: [pablochen.1996](#)
 - ✧ Can do [WhatsAPP](#) video call, tell us your whatsAPP number.
-
- We bring value to a lot projects during the past 20 years, also save a lot cost for many customers. If any problem, **please refrain from returning our products directly, as it would result in significant losses for us.** Contact our technical support please.
 - This is **advanced** security control system, programming need **software**(below have detail guide), If you want **simple control without software**(just allow/deny access), contact us and we can send you device **freely**, please **don't return all**, most parts can be used.
 - If you follow below guide, you can get below advanced features:
 - ❖ Different person have different access time.
 - ❖ Can use phone app to open door locally or remotely.
 - ❖ Can check history detail entry record: who open door at what time.
 - ❖ Easily add or delete or activate/disable users.
 - ❖ Keep door open during business time and close automatically at off duty time
 - ❖ Holiday Control automatically
 - ❖ A lot of advanced features...

Part 1 Quick Guide Of Software Part

1.1 Software download & Installation

Below is link for software portal(download, manual, video, advanced features)

<https://beseencontrol.com/software.html>

After download, please **right click mouse** on downloaded zip file and **extract to** a new folder firstly (check below picture)

Software support: win7/win8/win10/win11 .etc. all windows platform, run the related setup file to install.

Password of software:

account: abc

password: 123

Extended Function Password: **5678** (Optional Use)

Can also refer to below quick software video:

<https://vimeo.com/810041327/11d208ed9e>

1.2 Connect Control board with Network Cable

- ✧ **Make sure** there is **one Network Cable** connected from control panel's RJ45 Port to your **router/hub/switch** or to your **computer/laptop** directly.
- ✧ **Kindly note:** if connect **directly** to computer/laptop, please **disable the computer's WiFi** firstly.
- ✧ After programming done, it's **fully standalone system**. **no need** internet connection, **no need** hook to computer always, **no need** hook to network.
- ✧ If to computer/laptop directly and have no Network port, can also use "USB to Ethernet Adapter".

1.3 Search, Find and Add control Board in Software

- ✧ In Software, As below picture, search and find/add control panel into system.

The image consists of two screenshots from the ACCESS Professional Door Control Management software. The top screenshot shows the main interface with the 'Configuration' menu item highlighted (1), the 'Controllers' sub-menu selected (2), and the 'Search' button in the toolbar highlighted (3). A text overlay in pink reads: "Press: Configuration then Controllers then press 'Search'". The bottom screenshot shows the 'Search Controller' dialog box with the 'Add Found To Database' button highlighted (1) and a table of search results. A text overlay in pink reads: "Normally will find control board automatically, just press 'Add Found to Database'".

ACCESS Professional Door Control Management

File Configuration Operation One Card Multifunction Tools Help

Getting Started

1. Add Controllers By Searching

2. Auto Add Cards By Swiping

3. Add Privileges Allow And Upload

Swipe again, Open Close

Normally will find control board automatically, just press "Add Found to Database"

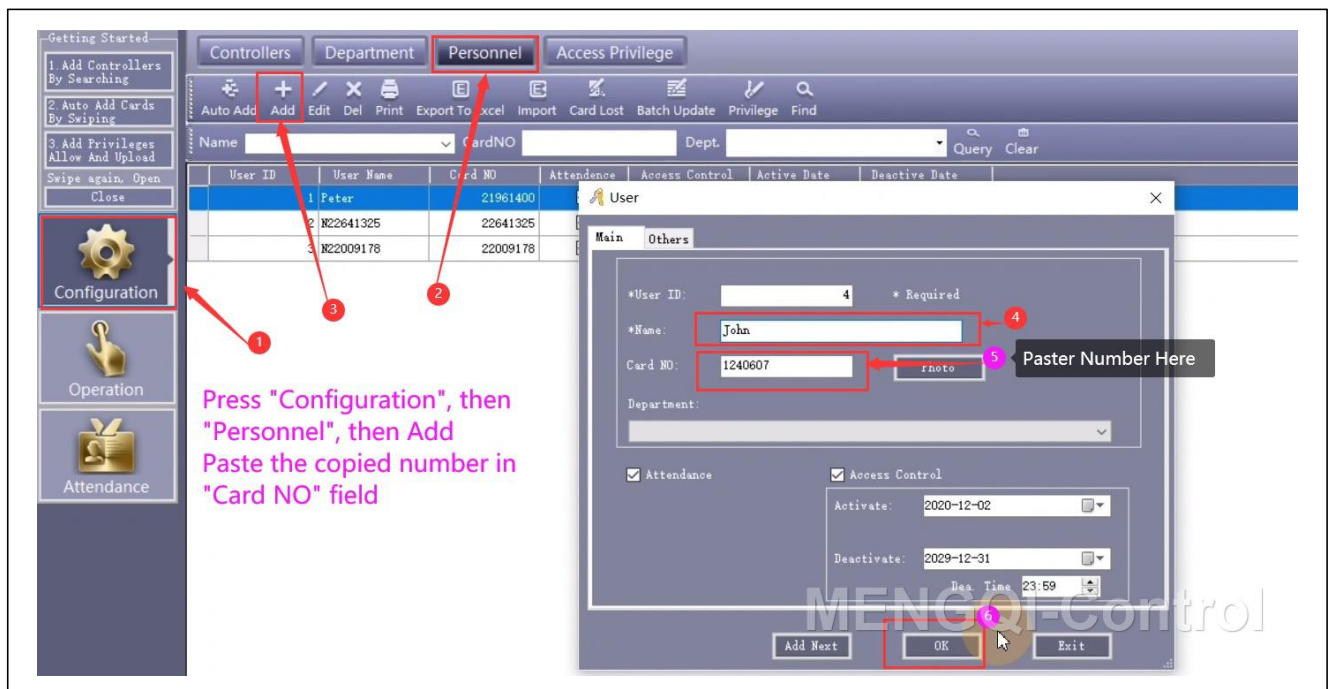

MENGQI-Control

1.4 Monitor and Add User

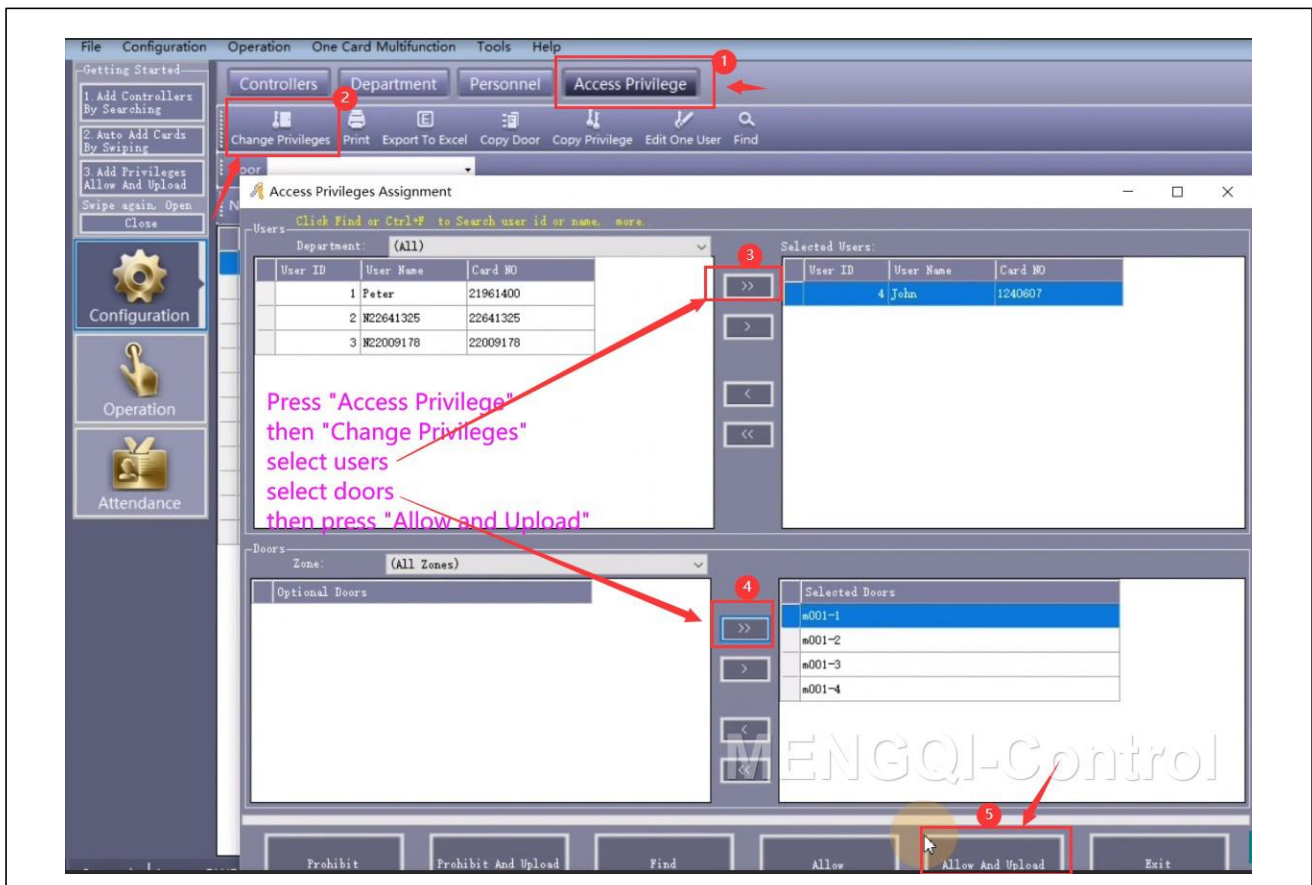

As below picture, press "Operation"->Select All, then press "Monitor", swipe on door reader and copy the card Number(**Ctrl+c** to copy).

Follow below steps to quickly add user:

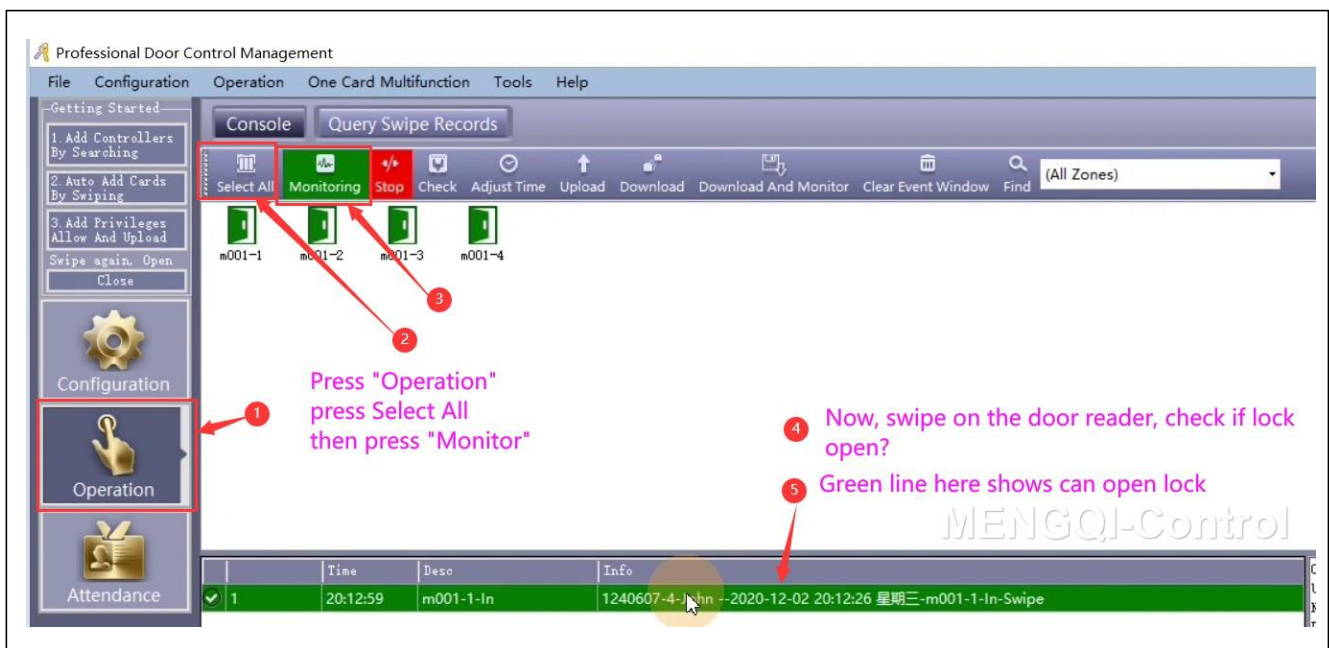

Then Follow below steps to assign/upload open privileges:

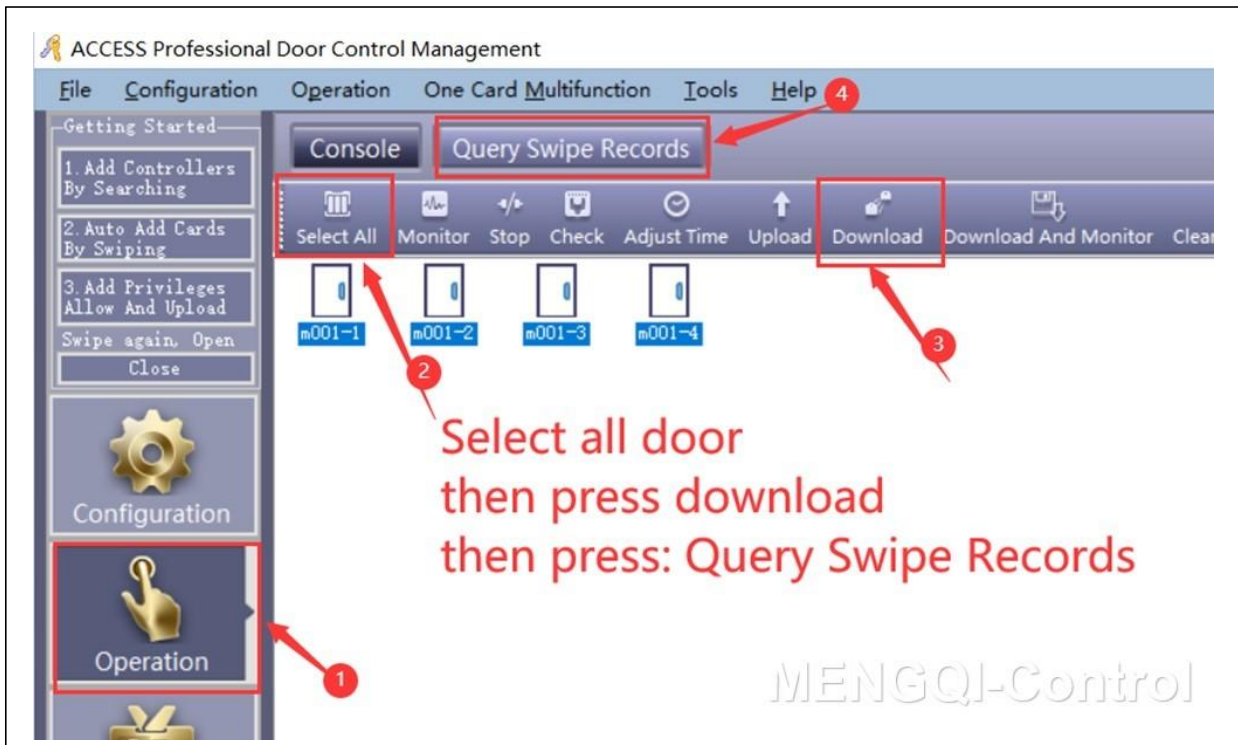

1.5 Test open lock and Check History Records

Follow below steps, Monitor in software and swipe the enrolled card/fob on door reader:

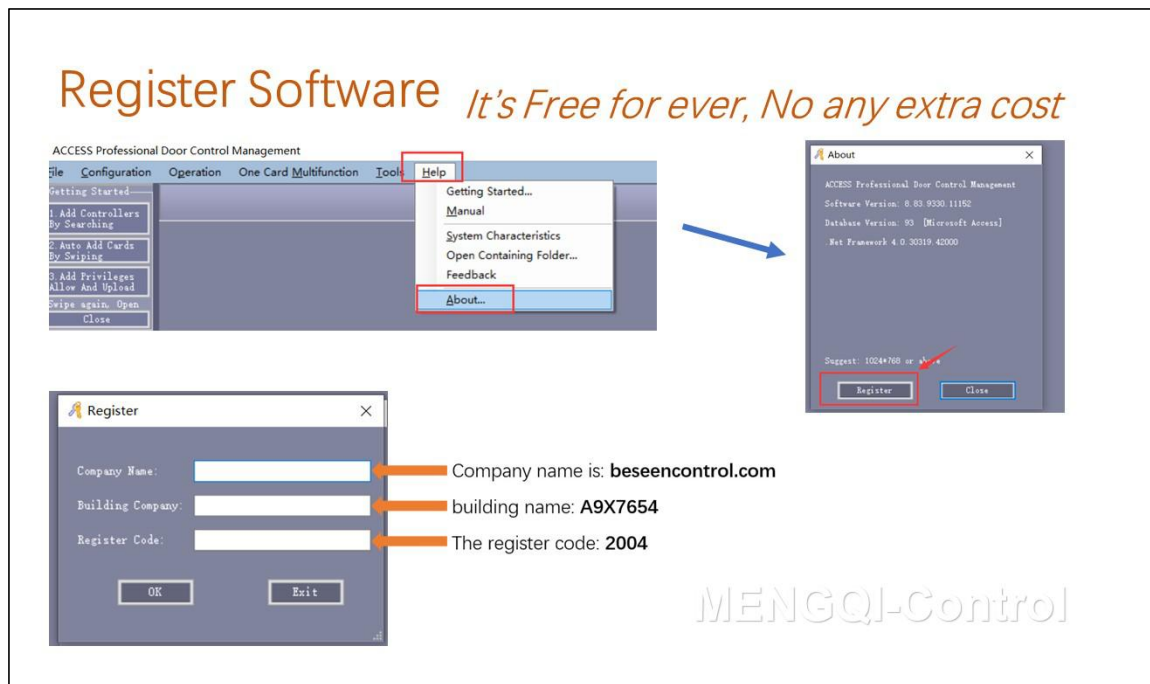

Follow below to **download and Query history** open records:

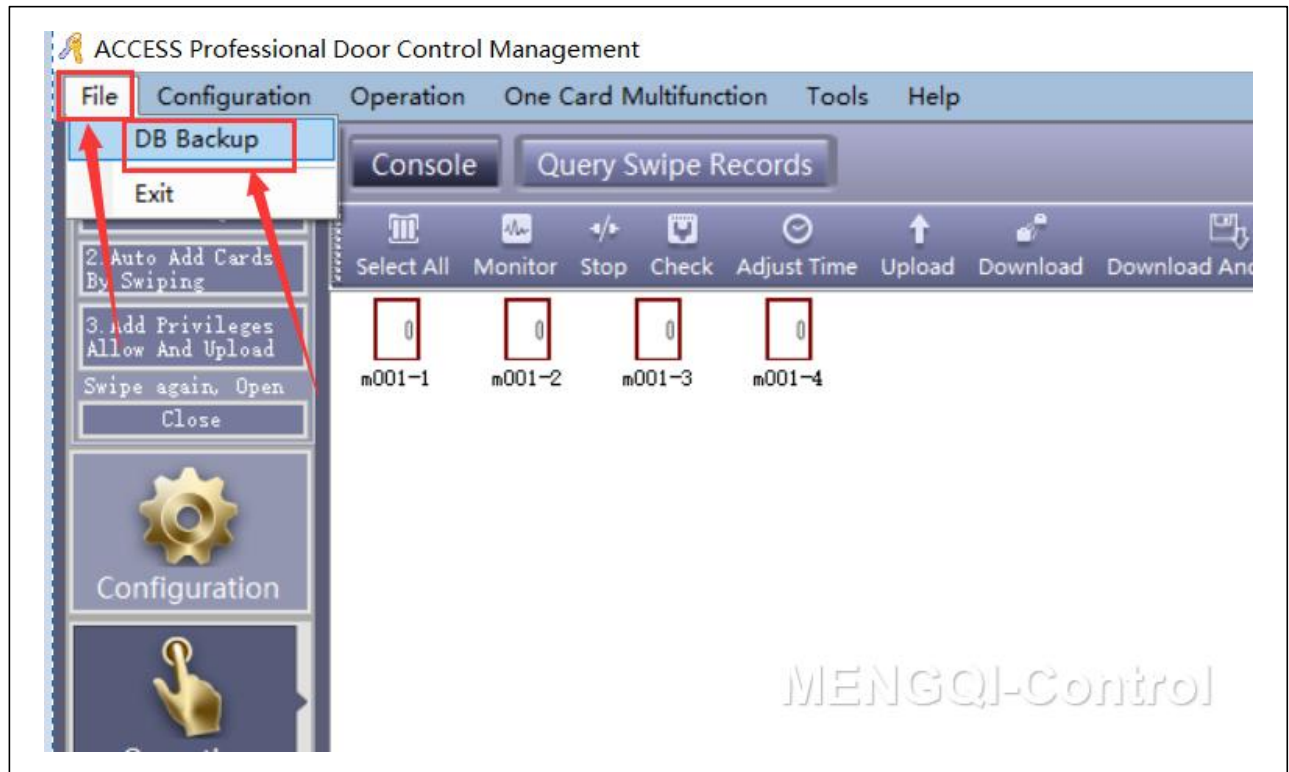

1.6 Register software(Free for ever)

The software is free for ever, upgrade freely for ever in future. **Follow below to register:**

1.7 Backup Database/configuration/setting data

In case computer fail or any exception, **Recover all in a minute** for all Data, **Highly recommend** that do database backup after programming done.

1.8 If you have **USB Desktop reader**, check this video:

With USB desktop reader, **easily** for programming.

<https://vimeo.com/717119097/4136517f85>

1.9 Some **Quick Check Tips** if have problem

Quick Tips

If swipe card/fob on door reader, the lock is NOT Open. **follow below tips:**

1. Kindly Check if can **open door from software?** Follow below **video:**

<https://vimeo.com/796308863/cfda22634c>

2. Do you set the door to **Normal close** or Normal open in the software?
Please refer to the below video link:

<https://vimeo.com/796306598/89b2375745>

3. **do monitor** in the software and swipe card or fob on door reader, **check the info in monitor window.** follow below link:

<https://beseencontrol.com/Monitoring.pdf>

If show **Deny access**, follow below **video** to solve:

<https://vimeo.com/796310661/a4636aa558>

Again ...Can also refer to below quick software video:

<https://vimeo.com/810041327/11d208ed9e>

- ✧ The software **is free for ever, upgrade freely** for ever in future.
- ✧ If you don't want the programming with software and network connection, we can **send you keypad controller device FREELY(tell us your shipping address and we will do shipping to you freely)**. it's easy programming, can enroll pin code or rfid card/fob, all on the device to operate. **Just it's function is simple**, just allow or deny open, **no below advanced features**.

- ✧ With this current system / software, **it has a lot features, such as:**
 - **Different person have different access time.**
 - Can use phone app to open door locally or remotely.
 - **Can check history detail entry record: who enter at what time.**
 - Easily add or delete or activate/disable users.
 - **Keep door open during business time and close automatically at off duty time**
 - Holiday Control automatically
 - **A lot of advanced features...**

Programming is one time job, once that done, it's no need hook to any network or software or computer, it's a totally stand alone system.

For hardware wire, please follow our picture; **For software side, we can do all for you remotely by live support if you need help.**

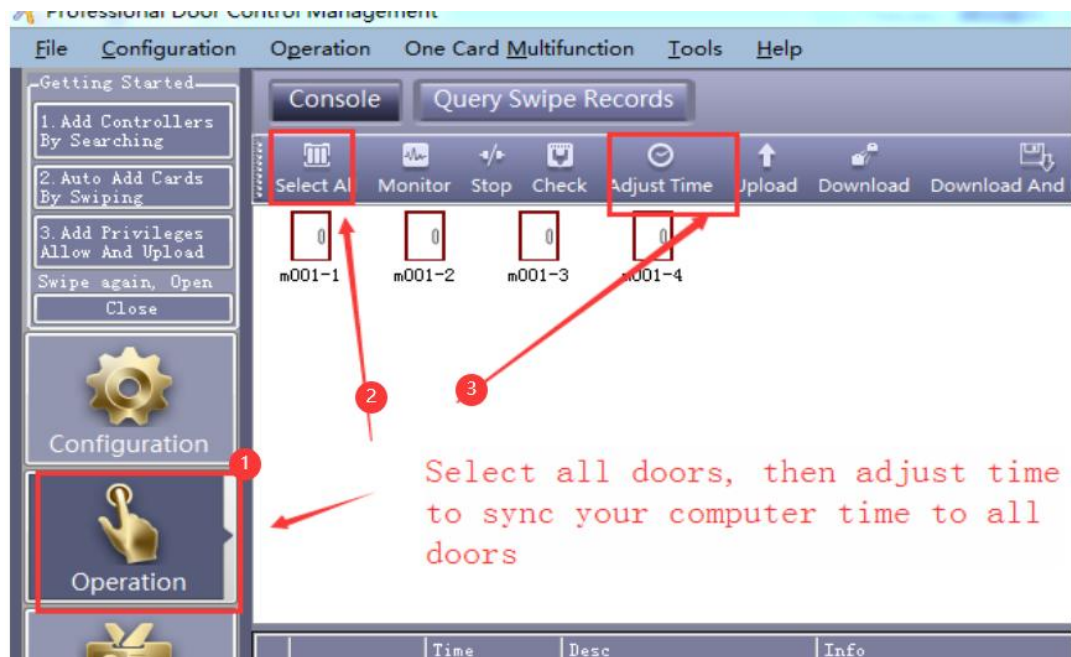

Thank you very much for placing an order. If you have any questions or concerns, please refrain from returning our products directly, as it would result in significant losses for us.

We take pride in delivering high-quality products and excellent service support. By giving us the opportunity to assist you, we can add substantial value to your project and help you save significantly .

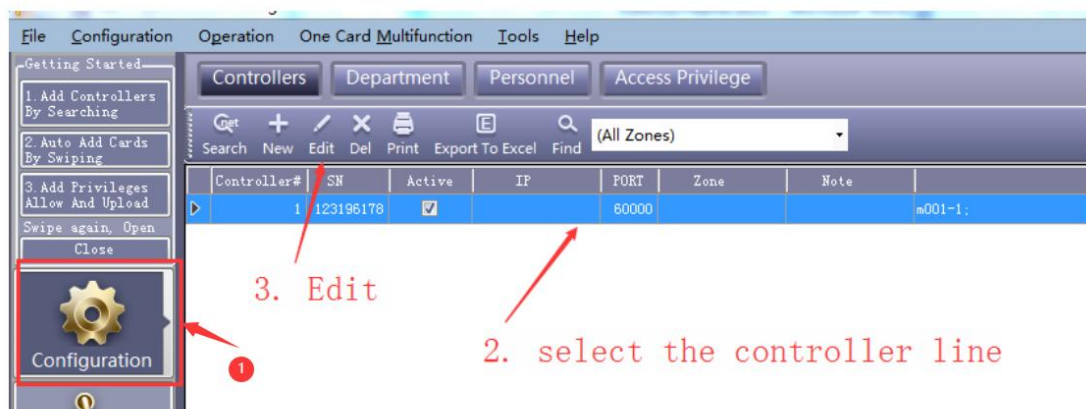

Part 2 Other Operation of Software

2.1 Adjust Time on control Board

Follow below picture of guide:

2.2 Edit door Name

Controller

*Controller #: 1 * Required

*SN: 123196178 Active

Small Network

Medium, large Network, Internet

Note:

Zone: Zones

Next >> Cancel

One Door

Edit door name here

Door Name

Door 1# m001-1 Active

Door Control State Control Open Close

Door Delay(sec) 3

Reader Position

Door1# In Reader In Attendance

Door1# Exit Reader Exit Attendance

OK Cancel

2.3 Remote open door from software

Follow below video:

<https://vimeo.com/796308863/cfda22634c>

2.4 How To Download and Check History Entrance Records

Kindly check this link:

<https://beseencontrol.com/DownloadCheck-Records-V1.pdf>

2.5 Change Software Login Password

Change operator and operator's password. Click Menu **【Tools】** > **【Edit Operator】**

Modify operator Name, input the **new account** name in “Name”.

For example, the company want the door automatically open in the morning, and keep open during business time, then auto lock back at off duty time.

Kindly check this link:

<https://beseencontrol.com/Auto-Open-Close.pdf>

3.4 Activate Access Keypad Using PIN Code

For pin code programming, check below instruction:

<https://vimeo.com/925721977/065944ccd2>

Or manual from:

<https://beseencontrol.com/PIN-Code-Program-New.pdf>

3.5 Import consumer's information from Excel

Please kindly check below guide:

<https://beseencontrol.com/HowToImportFromExcel.pdf>

3.6 Connect your Fire alarm system trigger door auto open in emergency

Please kindly check below instruction:

<https://beseencontrol.com/firemodule.html>

Part 4 About Lock Install and Exit Device

If the purchased lock is **not suitable** for your door/project, please **contact us firstly**. Because **most parts can be used**, contact us for **lock exchange solution**, kindly **don't return whole kit/system directly**, that will bring big loss to us.

4.1 Magnetic Lock Installation

Below is the guide:

<https://beseencontrol.com/hpatrol/Maglock-FAQ-Guide.pdf>

4.2 Strike Lock Installation

Below is the guide:

<https://beseencontrol.com/strikelock.html>

4.3 Exit device wire

Below is the guide:

<https://beseencontrol.com/exitwire.html>

Below Chapter is **trouble shooting tips**

Part 5 Trouble Shooting Guide
